

CLAIMS

What is claimed:

- 5 1. A cleaning implement, comprising:
- (a) a base;
- (b) a plurality of bristles attached to said base; and
- (c) a scuff removing means attachable to said base, said scuff removing means further
- 10 comprising a friction forming device for removing scuffs marks from floors and other
- surfaces.
2. The cleaning implement of claim 1, further comprising a handle attached to said base.
3. The cleaning implement of claim 1, wherein said plurality of bristles is attached to said
- 15 base substantially in the shape of a wedge.
4. The cleaning implement of claim 1, wherein said friction forming device further comprises
- a base, and wherein said base further comprises a curved portion upon which said scuff
- removing means is formed or mounted.
- 20 5. The cleaning implement of claim 1, wherein said friction forming device further comprises
- a pliable substrate, and wherein at least one side of said substrate is covered with natural
- fibers or synthetic fibers.
- 25 6. The cleaning implement of claim 1, wherein said friction forming device is attached to the
- front portion of said base, the rear portion of said base, or to either side of said base.
7. A cleaning implement, comprising:
- (a) a base, wherein said base further comprises top and bottom portions and front and
- 30 rear portions;
- (b) a plurality of bristles attached to said bottom portion of said base; and
- (c) a scuff removing means attachable to said front or rear portions of said base, said
- scuff removing means further comprising a friction forming device for removing
- scuffs marks from floors and other surfaces.

8. The cleaning implement of claim 7, further comprising a handle attached to said top portion of said base.

5 9. The cleaning implement of claim 7, wherein said plurality of bristles is attached to said base substantially in the shape of a wedge.

10 10. The cleaning implement of claim 7, wherein said friction forming device further comprises a base, and wherein said base further comprises a curved portion upon which said scuff removing means is formed or mounted.

11 11. The cleaning implement of claim 7, wherein said friction forming device further comprises a pliable substrate, and wherein at least one side of said substrate is covered with natural fibers or synthetic fibers.

15 12. A scuff-removing device, comprising:

(a) a base;

(b) a cleaning surface attached to or formed on said base, said cleaning surface further comprising a friction forming means for removing scuffs marks from floors and other surfaces; and

20 (c) a clip for attaching said base to the handle of a broom, mop, or the like.

13. The device of claim 12, wherein said scuff removing means further comprises a pliable substrate, and wherein at least one side of said substrate is covered with natural fibers or synthetic fibers.
